Art Unit: 1631

Claims 1-22, 25, 28, 29, and 33-38 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 11.

The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01. Embedded hyperlink and/or other form of browser-executable code appear in at least the following locations:

- (a) page 188, lines 12, 16, and 26-27 and
- (b) page 189, line 3.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 23, 26, 27, 31, 32, and 39-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is repeated for reasons already of record (e.g., Office action mailed November 15, 2002, paragraph bridging pages 3-4. Applicants did not argue the point that the instant application makes no connection between any of the results of an electronic Northern analysis and the level of, presence of, or absence of any biological molecule in any living system.

Claims 26, and 39-41 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for polypeptides that contain a defined SEQ ID NO: 181, does not reasonably provide enablement for polypeptides that contain sequences that are less than 100% homologous to SEQ ID NO: 181. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. This is a new ground of rejection. The instant application does not provide

Art Unit: 1631

adequate guidance for one of skill in the art to make and use a reasonable number of polypeptides that have the disclosed utility from among the astronomical number of polypeptides embraced by the claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
